Intergenerational Learning in Practice Margaret Kernan 2019-10-31 Based on innovative global practice, Intergenerational Learning in Practice presents a unique contribution to the field of intergenerational learning. Drawing on the Together Old and Young (TOY) programme, this book provides a comprehensive background to intergenerational learning, along with tools and resources to help develop and improve your own intergenerational practice. Experienced international authors from Europe, North America and Australia provide a broad array of perspectives on intergenerational learning, ranging from pedagogy to planning and community development, and cover topics including: The context, theory and existing research behind intergenerational learning. The changing relationships between young children and older adults Building communities and
services for all ages Managing everyday encounters in public spaces between young and old Ensuring quality in intergenerational practice Insights on how intergenerational learning challenges discrimination Intergenerational Learning in Practice is a valuable resource for practitioners and leaders in Early Childhood Education and Care and those working in primary schools, as well as professionals caring for older adults, and those working in community development.

Host Bibliographic Record for Boundwith Item Barcode 30112044669122 and Others 2013 A Century of Juvenile Justice Margaret K. Rosenheim 2002-03-15 Systems for Youth in Trouble Operations Research Problems Raúl Poler 2013-11-08 The objective of this book is to provide a valuable compendium of problems as a reference for undergraduate and graduate students, faculty, researchers and practitioners of operations research and management science. These problems can serve as a basis for the development or study of assignments and exams. Also, they can be useful as a guide for the first stage of the model formulation, i.e. the definition of a problem. The book is divided into 11 chapters that address the following topics: Linear programming, integer programming, non linear programming, network modeling, inventory theory, queue theory, tree decision, game theory, dynamic programming and markov processes. Readers are going to find a considerable number of statements of operations research applications for management decision-making. The solutions of these problems are provided in a concise way although all topics start with a more developed resolution. The proposed problems are based on the research experience of the authors in real-world companies so much as on the teaching experience of the authors in order to develop exam problems for industrial engineering and business administration studies.

Simulation of Communication Systems Michel C. Jeruchim 2006-04-11 Since the first edition of this book was published seven years ago, the field of modeling and simulation of communication
systems has grown and matured in many ways, and the use of simulation as a day-to-day tool is now even more common practice. With the current interest in digital mobile communications, a primary area of application of modeling and simulation is now in wireless systems of a different flavor from the `traditional' ones. This second edition represents a substantial revision of the first, partly to accommodate the new applications that have arisen. New chapters include material on modeling and simulation of nonlinear systems, with a complementary section on related measurement techniques, channel modeling and three new case studies; a consolidated set of problems is provided at the end of the book.

**Psychosocial Issues in Palliative Care** Mari Lloyd-Williams 2008-05-08 "Psychosocial Issues in Palliative Care is for anyone working the field of palliative care, both in the community and in hospitals; this includes those in medicine, nursing, social work, chaplaincy, counseling, primary care, and mental health."--Jacket.

**Benchmarks for Science Literacy** American Association for the Advancement of Science 1994-01-06 Published to glowing praise in 1990, Science for All Americans defined the science-literate American--describing the knowledge, skills, and attitudes all students should retain from their learning experience--and offered a series of recommendations for reforming our system of education in science, mathematics, and technology. Benchmarks for Science Literacy takes this one step further. Created in close consultation with a cross-section of American teachers, administrators, and scientists, Benchmarks elaborates on the recommendations to provide guidelines for what all students should know and be able to do in science, mathematics, and technology by the end of grades 2, 5, 8, and 12. These grade levels offer reasonable checkpoints for student progress toward science literacy, but do not suggest a rigid formula for teaching. Benchmarks is not a proposed
curriculum, nor is it a plan for one: it is a tool educators can use as they design curricula that fit their student's needs and meet the goals first outlined in Science for All Americans. Far from pressing for a single educational program, Project 2061 advocates a reform strategy that will lead to more curriculum diversity than is common today. IBenchmarks emerged from the work of six diverse school-district teams who were asked to rethink the K-12 curriculum and outline alternative ways of achieving science literacy for all students. These teams based their work on published research and the continuing advice of prominent educators, as well as their own teaching experience. Focusing on the understanding and interconnection of key concepts rather than rote memorization of terms and isolated facts, Benchmarks advocates building a lasting understanding of science and related fields. In a culture increasingly pervaded by science, mathematics, and technology, science literacy require habits of mind that will enable citizens to understand the world around them, make some sense of new technologies as they emerge and grow, and deal sensibly with problems that involve evidence, numbers, patterns, logical arguments, and technology--as well as the relationship of these disciplines to the arts, humanities, and vocational sciences--making science literacy relevant to all students, regardless of their career paths. If Americans are to participate in a world shaped by modern science and mathematics, a world where technological know-how will offer the keys to economic and political stability in the twenty-first century, education in these areas must become one of the nation's highest priorities. Together with Science for All Americans, Benchmarks for Science Literacy offers a bold new agenda for the future of science education in this country, one that is certain to prepare our children for life in the twenty-first century.

Optimising New Modes of Assessment: In Search of Qualities and Standards Mien Segers 2006-04-11 This is an essential book for all those concerned with the field of assessment. It
addresses relevant and timely conceptual and practical issues from a research perspective and, based on research results, clearly provides solutions to practical applications at the cutting edge of the emerging area of new modes of assessment. In a clear and rigorous manner, the authors explore new methods and study the various quality aspects of innovative approaches.

**Performance Assessment of Urban Infrastructure Services** Enrique Cabrera Jr 2008-03-01

Performance assessment has been one of the hottest topics in the water industry in the past decade. In that period, the International Water Association has played a key role, and the performance indicators systems developed for drinking water and wastewater utilities have become a reference worldwide. This book represents a collection of the papers presented to the Pi08 Conference, in
Valencia, Spain (March 2008). The conference represents the final stage in the COST C18 Action, funded by the EU and brings together some of the most relevant professionals in the water industry. The book covers the latest trends in performance assessment, as well as relevant case studies from practical applications in utilities around the globe. Themes: Performance Indicators Metric Benchmarking Process Benchmarking Asset Management Regulation Case Studies

**Handbook of Research on Mobile Devices and Applications in Higher Education Settings**

Briz-Ponce, Laura 2016-07-13 Mobile phones have become an integral part of society, as their convenience has helped democratize and revolutionize communication and the marketplace of ideas. Because of their ubiquity in higher education, undergraduate classrooms have begun to utilize smartphones and tablets as tools for learning. The Handbook of Research on Mobile Devices and Applications in Higher Education Settings explores and fosters new perspectives on the use of mobile applications in a classroom context. This timely publication will demonstrate the challenges that universities face when introducing new technologies to students and instructors, as well as the rewards of doing so in a thoughtful manner. This book is meant to present the latest research and become a source of inspiration for educators, administrators, researchers, app developers, and students of education and technology.

Advances and Applications in Model-Driven Engineering Díaz, Vicente García 2013-08-31 As organizations and research institutions continue to emphasize model-driven engineering (MDE) as a first-class approach in the software development process of complex systems, the utilization of software in multiple domains and professional networks is becoming increasingly vital. Advances and Applications in Model-Driven Engineering explores this relatively new approach in software development that can increase the level of abstraction of development of tasks. This publication covers the issues of bridging the gaps between various disciplines within software engineering and computer science. Professionals, researchers, and students will discover the most current tools and techniques available in the field to maximize efficiency of model-driven software development.

The Library Dividend SGS Economics & Planning 2012 These Library Dividend reports, archived from the Public Libraries Connect website, form a major independent study of the socio-economic contribution of Queensland's public libraries. The aim of the study was to expand the understanding of the value of public libraries to the community, prove that public libraries contribute economic benefit to the community, and provide Queensland public libraries with data to build a stronger case in securing their future funding. The report was commissioned by the State Library of Queensland and research was carried out by SGS Economics and Planning.

The Outermost House Henry Beston 1928 Long recognized as a classic of American nature writing. This chronicle of a solitary year spent on a Cape Cod beach was written in longhand at the kitchen table, in a little room overlooking the North Atlantic and the dunes. In 1964, the Cape Cod house was officially proclaimed a National Literary Landmark. In 1978, a massive winter storm swept it off
its foundation and out to sea.

Local Histories/Global Designs Walter Mignolo 2000-02-06 This book is an extended argument on the "coloniality" of power by one of the most innovative scholars of Latin American studies. In a shrinking world where sharp dichotomies, such as East/West and developing/developed, blur and shift, Walter Mignolo points to the inadequacy of current practice in the social sciences and area studies. He introduces the crucial notion of "colonial difference" into study of the modern colonial world. He also traces the emergence of new forms of knowledge, which he calls "border thinking."
Further, he expands the horizons of those debates already under way in postcolonial studies of Asia and Africa by dwelling in the genealogy of thoughts of South/Central America, the Caribbean, and Latino/as in the United States. His concept of "border gnosis," or what is known from the perspective of an empire's borderlands, counters the tendency of occidentalist perspectives to dominate, and thus limit, understanding. The book is divided into three parts: the first chapter deals with epistemology and postcoloniality; the next three chapters deal with the geopolitics of knowledge; the last three deal with the languages and cultures of scholarship. Here the author reintroduces the analysis of civilization from the perspective of globalization and argues that, rather than one "civilizing" process dominated by the West, the continually emerging subaltern voices break down the dichotomies characteristic of any cultural imperialism. By underscoring the fractures between globalization and mundializacion, Mignolo shows the locations of emerging border epistemologies, and of post-occidental reason. In a new preface that discusses Local Histories/Global Designs as a dialogue with Hegel's Philosophy of History, Mignolo connects his argument with the unfolding of history in the first decade of the twenty-first century.

Political Education in a Democracy Harold Entwistle 2012-05-04 In this volume the author analyzes the relationships of concepts such as socialization and political education, explains those aspects of the theory and practice of democracy that are especially relevant for schools, and suggests ways in which teachers can better provide for the political education of their students.

Alongside Community Debra A. Harkins 2017-11-09 Alongside Community is a step-by-step guide that prepares social science students to be democratic citizens by examining the theory, method, and sociopolitical dynamics that impact helping those different from oneself. The first part of this book explores the more theoretical issues of helping others, including issues of social identity, values, and power. The second part of this guidebook examines action-based methods; interventions available for community-based engagement; and the sociopolitical issues that inevitably arise for those who strive to create social change including issues of race, ethnicity, social class, gender, sexual orientation, mental health, educational and environmental justice along with suggestions on how to address these issues. The third part of Alongside Community critically explores how to measure the impact of community service on major stakeholders including student, faculty, college and community agency and ends with reflections and suggestions on how to be a lifelong civically engaged citizen.

The Medieval Prison G. Geltner 2014-02-24 The modern prison is commonly thought to be the fruit of an Enlightenment penology that stressed man's ability to reform his soul. The Medieval Prison challenges this view by tracing the institution's emergence to a much earlier period beginning in the
late thirteenth century, and in doing so provides a unique view of medieval prison life. G. Geltner carefully reconstructs life inside the walls of prisons in medieval Venice, Florence, Bologna, and elsewhere in Europe. He argues that many enduring features of the modern prison—including administration, finance, and the classification of inmates—were already developed by the end of the fourteenth century, and that incarceration as a formal punishment was far more widespread in this period than is often realized. Geltner likewise shows that inmates in medieval prisons, unlike their modern counterparts, enjoyed frequent contact with society at large. The prison typically stood in the heart of the medieval city, and inmates were not locked away but, rather, subjected to a more coercive version of ordinary life. Geltner explores every facet of this remarkable prison experience—from the terror of an inmate’s arrest to the moment of his release, escape, or death—and the ways it was viewed by contemporary observers. The Medieval Prison rewrites penal history and reveals that medieval society did not have a "persecuting mentality" but in fact was more nuanced in defining and dealing with its marginal elements than is commonly recognized.

...y no se lo tragó la tierra / ...And the Earth Did Not Devour Him Tomás Rivera 2015-09-30 “I tell you, God could care less about the poor. Tell me, why must we live here like this? What have we done to deserve this? You’re so good and yet you suffer so much,” a young boy tells his mother in Tomás Rivera’s classic novel about the migrant worker experience. Outside the chicken coop that is their home, his father wails in pain from the unbearable cramps brought on by sunstroke after working in the hot fields. The young boy can’t understand his parents’ faith in a god that would impose such horrible suffering, poverty and injustice on innocent people. Adapted into the award-winning film ...and the earth did not swallow him and recipient of the first award for Chicano literature, the Premio Quinto Sol, in 1970, Rivera’s masterpiece recounts the experiences of a
Mexican-American community through the eyes of a young boy. Forced to leave their home in search of work, the migrants are exploited by farmers, shopkeepers, even other Mexican Americans, and the boy must forge his identity in the face of exploitation, death and disease, constant moving and conflicts with school officials. In this new edition of a powerful novel comprised of short vignettes, Rivera writes hauntingly about alienation, love and betrayal, man and nature, death and resurrection and the search for community.
